

The Midwest Finance Association and *Journal of Trading* are pleased to announce a Call For Papers that deal with

### **Trading, Markets and Risk**

We are interested in any paper that is trading related, regardless of the market to which the analysis, theoretical or applied is directed. Papers included in this joint collaboration will be selected from those presented at the 2008 Midwest Finance Association Conference February 27-March 1, 2008, San Antonio, Texas.

Topics include, but are not limited to:

- Market Liquidity
- Market Microstructure
- Price Discovery
- Execution Quality and Speed
- Trading Measures
- Algorithmic Trading and Trading Strategies
- Electronic Trading
- Risk Measures
- Market Making
- Market Sentiment and Trade Directions
- Shortfall Risk
- Active versus Passive Strategies
- Trading and Market Efficiency

All authors with accepted papers at the 2008 Midwest Finance Association Conference, whose papers fit any of the above areas of interest, regardless of paper track, are asked to consider submitting their papers for

publication. Requests must be made to any of the issue editors by March 10, 2008, and marked

MFA-Journal of Trading  
**Trading, Markets and Risk**

You can of course upload a revised copy of your paper on the program conference website, [www.mfa-2008.com](http://www.mfa-2008.com) and simply let the editors know the reference number of your paper. There is no submission fee. Select conference papers will appear in the subsequent volume (s) of Journal of Trading, after clearing the journal's normal review process. Further program details are available on the MFA conference website.

**SPECIAL EDITORS:**

Thomas McInish, University of Memphis

Robert Van Ness, University of Mississippi

Li Wei, New York Stock Exchange
